RoHS 3000 - 7000 N

Castors with bracket for medium-heavy loads

Soft polyurethane coating

COVERING
Soft mould-on polyurethane, hardness 75 Shore A.

WHEEL CENTRE BODY
Pressure die-cast aluminium.

ROLLING ACTION
Hub with ball bearings. Ideal solution for heavy loads and continuous moving.

FIXED PLATE BRACKET
Yellow zinc-plated steel sheet. The bracket is designed to withstand loads up to 7000N. It ensures capacities that make it suitable for heavy industrial applications.

TURNING PLATE BRACKET
Yellow zinc-plated steel sheet. The bracket is designed to withstand loads up to 7000N. It ensures capacities that make it suitable for heavy industrial applications.
It consists of (see Fig.1):
1. fitting plate: yellow zinc-plated steel sheet;
2. fork: yellow zinc-plated steel sheet;
3. ball race ring: yellow zinc-plated steel sheet;
4. central pin: class 8.8 steel screw and steel nut;
5. rotation system: dual grease-lubricated ball race;
6. dust seal: RAL 7015 dark grey technopolymer.

BRAKE
Front brake (RE.F2-100) or rear brake (RE.F2-125-160-200) dual-effect with simultaneous locking of wheel and bracket.
The brake is simple and effective to use: it is actuated and released by a simple action from the top downward at the tip of two separate pedals, thus ensuring the utmost manoeuvring comfort.
On wheels with a rear brake, the braking efficacy may be adjusted with a socket head screw M8.

STANDARD EXECUTIONS
- **PSL-H**: fixed bracket, without brake.
- **SSL-H**: turning plate bracket, without brake.
- **SSF-H**: turning plate bracket, with brake.

APPLICATIONS
Excellent smoothness and elasticity features, high wear and tearing resistance.
