

Solid handwheels

Duroplast, steel hub

MATERIAL

High-strength, reinforced phenolic based (PF) Duroplast, black colour, glossy finish.

RING

Matte anodised aluminium.
(ELESA Original design - Reg. U.S. Pat. & TM Off.)

STANDARD EXECUTIONS

- Black-oxide steel hub with H7 reamed hole.
- H9 reamed hole for executions with keyway.
- **VDN.FP-A**: without handle.
- **VDN.FP+I-A**: with revolving handle I.301+x (see page) in Duroplast.
- **VDN.FP+IR-A**: with fold-away handle IR.407 in Duroplast.
- **VDN.FP+IRS-A**: with automatic fold-away safety handle "Fold-O-matic"® type IRS.820 (see page) in technopolymer.
- **K**: index for executions with hole and keyway in compliance with DIN 6885/1 (see page A-16), tolerance P9 i.e.: 73650-10-K VDN.50 FP-A10-K

Black-oxide steel hub not drilled in order to make holes different from the standard:

- **VDN.FP**: without handle.
- **VDN.FP+I**: with revolving handle I.301+x (see page) in Duroplast.
- **VDN.FP+IR**: with fold-away handle IR.407 in Duroplast.
- **VDN.FP+IRS**: with automatic fold-away safety handle "Fold-O-matic"® IRS.820 (see page) in technopolymer.

ACCESSORIES ON REQUEST

Axial retaining washer in black-oxide steel GN 184 (see page -).

SPECIAL EXECUTIONS ON REQUEST

- Handwheels with incorporated balancing counterweights.
- Handwheels with cross holes according to GN 110 (see page -).

ERGONOMY

The rim with internal rear scallops makes the grip and the manoeuvre of the handwheel easier.

ELESA Original design
